

Neelain Journal of Science and Technology (NJST)

Neelain Journal of Science and Technology (NJST) welcomes submissions of refereed, well-written original research articles, and studies that describe the latest research and developments in all disciplines of Science and Technology. NJST is to be published quarterly and issued by Faculty of Science and Technology, Al Neelain University, Khartoum, Sudan; P. O. Box 12702.

EDITORIAL BOARD

Editor-in-Chief

Professor Abdel Karim Sabir Ali

Faculty of Science and Technology, Al Neelain University

Editorial Board

Dr. Asma Abdel Rahman Ahmed

Dr. Seedahmed Ahmed Mohamed

Dr. Ammar Mohamed Ismael Maryoud

Dr. Maha Abdel hafeez Mohamed

Instructions for Authors

Initial Manuscript Submission

Maximum length for submitted papers is 10000 words; for short communication and case report, 3500 words; for discussions, 2000. Submitted manuscripts should not have been previously published and should not be submitted for publication elsewhere while they are under consideration by Journal of Faculty of Sciences and Technology. Submitted material will not be returned to the author unless specifically requested.

Authors must also supply

1. An electronic copy of the final version (see section below),
2. A covering letter and copyright transfer agreement with original signature(s)-without this we are unable to accept the submission.
3. Permission grants- if the manuscript contains extracts, including illustrations; from other copyright works (including material from on-line or internet sources) it is the author's responsibility to obtain written permission from the owners of the publishing rights to reproduce such extracts using the Permission Request Form.

Type of Papers

The journal publishes peer refereed (reviewed) research high-quality original scientific papers, short communications, correspondence and case studies pertaining to different disciplines of Science (Biological Sciences, Chemistry, Physics and Technology).

Submission of Manuscript

Manuscript, or the essence of their content, must be previously unpublished and should not be under simultaneous consideration by another journal. The authors should also declare if any similar work has been submitted to or published by another journal. They should also declare that it has not been submitted/published elsewhere in the same form, in English or in any other language, without the written consent of the Publisher. The authors should also declare that the paper is the original work of the author (s) and not copied (in whole or in part) from any other work. All papers will be automatically checked for duplicate publication and plagiarism. If detected, appropriate action will be taken in accordance with International Ethical Guideline. By virtue of the submitted manuscript, the corresponding author acknowledges that all the co-authors have seen and approved the final version of the manuscript. The corresponding author should provide all co-authors with information regarding the manuscript, and obtain their approval before submitting any revisions.

Electronic submission of manuscripts is strongly recommended, provided that the text, tables and figures are included in a single Microsoft Word file. Submit manuscript as e-mail attachment to the Editorial Office at aksabirali@gmail.com

After submission, a manuscript number will be communicated to the corresponding author within 48 hours.

Preparation of Manuscript

The manuscript should be written in English with simple lay out. The text should be prepared in single column format. Bold face, italics, subscripts, superscripts etc. can be used. Pages should be numbered consecutively, beginning with the title page and

continuing through the last page of typewritten material. The text, excluding the abstract, if required, can be divided into numbered sections with brief headings. Starting from introduction with section 1, Subsections should be numbered (for example 2.1 (then 2.1.1, 2.1.2, 2.2 ... etc.) up to three levels.

Manuscripts in general should be organized in the following manner:

- Title
- Abstract
- Keywords
- Introduction
- Materials & Methods
- Results
- Discussion
- Conclusion
- Acknowledgements
- References

Brief guidelines

Title Page

The title page should contain a brief title, first full name, middle initial and family full name of each author and name and address of the department(s) and institution(s) from where the research was carried out for each author. The title should be without any abbreviations and it should enlighten the contents of the paper. All affiliations should be provided with a lower-case superscript number just after the author's name and in front of the appropriate address.

The name of the corresponding author should be indicated along with telephone and fax numbers (with country and area code) along with full postal address and email address.

Abstract

The abstract should be concise and informative. It should not exceed 200-300 words in length for full manuscript and Review article and 100 words in case of Case Report and/ or Short Communication. It should briefly describe the purpose of the work; techniques and methods used major findings with important data and conclusions. No references should be cited in this part. Generally non –standard abbreviations should not be used, if necessary they should be clearly defined in the abstract, at first use.

Keywords

Immediately after the abstract, 4-8 keywords should be given. Use of abbreviations should be avoided, only standard abbreviations; well known in the established area may be used, if appropriate. These keywords will be used for indexing.

Abbreviations

Non-standard abbreviations should be listed and full form of each abbreviation should be given in parentheses at first use in the text.

Introduction

Provide a factual background, clearly defined problem, proposed solution, a brief literature survey and the scope and justification of the work done.

Materials and Methods

Give adequate information to allow the experiment to be reproduced. Already published methods should be mentioned with references. Significant modifications of published methods and new methods should be described in detail. Capitalize trade names, manufacturer's names and addresses should be included. Subheading should be used.

Results

Results should be clearly described in a concise manner. Results for different parameters should be described under subheadings or in separate paragraph. Results should be explained, but largely without referring to the literature. Table or figure numbers should be mentioned in parentheses for better understanding.

Discussion

The discussion should not repeat the results, but provide detailed interpretation of data. This should interpret the significance of the findings of the work. Citations should be given in support of the findings.

The results and discussion part can also be described as separate, if appropriate. The Results and Discussion sections can include subheadings, and when appropriate, both sections can be combined

Conclusion

This should briefly state the major findings of the study.

Acknowledgment

A brief acknowledgment section may be given after the conclusion section just before the references. The acknowledgment of people who provided assistance in manuscript preparation, funding for research, etc. should be listed in this section.

Tables and Figures

Tables and figures should be presented as per their appearance in the text. It is suggested that the discussion about the tables and figures should appear in the text before the appearance of the respective tables and figures. No tables or figures should be given without discussion or reference inside the text. Tables should be explanatory enough to be understandable without any text reference. Double spacing should be maintained throughout the table, including table headings and footnotes. Table headings should be placed above the table. Footnotes should be placed below the table with superscript lower case letters. Each table should be on a separate page, numbered consecutively in Arabic numerals. Each figure should have a caption. The caption should be concise and typed separately, not on the figure area. Figures should be self-explanatory. Information presented in the figure should not be repeated in the table. All symbols and abbreviations used in the illustrations should be defined clearly. Figure legends should be given below the figures.

Reference style

References should be listed alphabetically at the end of the manuscript. Every reference referred in the text must be also present in the reference list and vice versa. In the text, a reference identified by means of an author's name should be followed by the year of publication in parentheses e.g. (Brown, 2009)). For two authors, both

authors' names followed by the year of publication (e.g. Nelson and Brown, 2007). When there are more than two authors, only the first author's name followed by "et al." and the year of publication (e.g. Ali *et al.*, 2014). When two or more works of an author has been published during the same year, the reference should be identified by the letters "a", "b", "c", etc., placed after the year of publication. This should be followed both in the text and reference list. e.g. Hilly, (2002a, 2002b); Hilly, and Nelson, (2004). Articles in preparation or submitted for publication, unpublished observations, personal communications, etc. should not be included in the reference list but should only be mentioned in the article text (e.g., Sabir, A., A., Al Neelain University, personal communication). Journal titles should be abbreviated according to the system adopted in Biological Abstract and Index Medicus, if not included in Biological Abstract or Index Medicus journal title should be given in full. The author is responsible for the accuracy and completeness of the references and for their correct textual citation. Failure to do so may result in the paper being withdrawn from the evaluation process. Below are samples of properly formatted and complete references:

Reference to a journal publication

Bloch, B. K. (2002). Econazole nitrate in the treatment of *Candida vaginitis*. *S. Afr. Med J*, 58, 314-323.

Ogunseitan O. A. and Ndoeye, I. L. (2006). Protein method for investigating mercuric reductase gene expression in aquatic environments. *Appl Environ Microbiol.* 64, 695-702.

Hilly, M. O., Adams, M. N. and Nelson, S. C. (2009). Potential fly-ash utilization in agriculture. *Progress in Natural Sci*, 19, 1173-1186.

Reference to a book

Brown, W. Y. and White, S. R. (1985). *The Elements of Style*, 3rd ed. MacMillan, New York.

Reference to a chapter in an edited book:

Mettam, G. R. and Adams, L. B. (2010). How to prepare an electronic version of your article In: Jones BS and Smith R. Z. (Eds.), *Introduction to the Electronic Age*. Kluwer Academic Publishers, Netherlands, pp. 281–304.

Conferences and Meetings:

Embabi, N. S. (1990). Environmental aspects of distribution of mangrove in the United Arab Emirates. Proceedings of the First ASWAS Conference. University of the United Arab Emirates. Al-Ain, United Arab Emirates.

Theses and Dissertations:

Gadelerb, T. O. (2005). Ecological studies on the natural and cultivated vegetation in Kelli Area- River Nile State, Sudan. M. Sc. Thesis submitted to Al Neelain University, Unpublished.

Web Pages and On-line Material:

Burka, L.P. (2002). "A hypertext history of multiuser dimensions." MUD history, <http://www.ccs.neu.edu> (Dec. 5, 2003). Include an author if possible, a copyright date,

a title, the Web address, and the date the material was accessed or downloaded (in parentheses at the end).

Illustrations

Supply each illustration on a separate sheet with the lead author's name, the figure number and the top of the figure indicated, on the reverse. Supply original photographs; photocopies or previously printed material are not acceptable. Line artwork must be high-quality laser output (not photocopies). Tints are not acceptable; lettering must be of a reasonable size that would still be clearly legible upon reduction, and consistent within each figure and set of figures. Electronic versions of the artwork should be supplied at the intended size for printing; the maximum column width is 143 mm. The cost of printing color illustrations in the Journal may be charged to the author.

Copyright

To enable the publisher to disseminate the author's work to the fullest extent, the author must sign a Copyright Transfer Agreement, transferring copyright in the article from the author to the publisher, and submit the original signed agreement with the article presented for publication. A copy of the agreement to be used (which may be photocopied) can be found in the first issue of each volume of the journal. Copies may also be obtained from the journal editor or publisher, or may be printed from this web site.

Further Information

PDF proofs will be sent to the corresponding author for checking via e-mail. This stage is to be used only to correct errors that may have been introduced during the production process. Prompt return of the corrected proofs, preferably within two days of receipt, will minimize the risk of the paper being held over to a later issue. Twenty (20) complimentary off prints will be provided to the corresponding author, unless otherwise indicated. There is no page charge to authors. Further off prints and copies of the Journal may be ordered.

Disclaimer

Articles, communication, or editorials published by NJST represent the sole opinions of the authors. The publisher shoulders no responsibility or liability what so ever for the use or misuse of the information published by NJST.

Manuscripts should be submitted to Mailing address: aksabirali@gmail.com

EDITORIAL PREFACE

The Editor in Chief, the Editorial and the Advisory Boards of Neelain Journal of Science and Technology “NJST” have the pleasure to publish the 2nd volume, 1st issue of the journal. NJST is a multi-disciplinary, refereed, peer reviewed quarterly international journal issued by the Faculty of Science and Technology, Al Neelain University, Khartoum Sudan. NJST is expected to publish new findings and up to date research in different disciplines of scientific research and development. It also encourages the submission of critical review articles covering advances in recent research of science and technology fields as well as technical notes.

Publishing NJST Journal will hopefully establish and provide an international avenue for information exchange in all fields of scientific research and a highly readable and valuable addition to the literature, which will serve as an indispensable reference tool for years to come. NJST also encourages the submission of critical review articles covering advances in recent research of such fields as well as technical notes.

NJST Editorial Board will do their best effort to promote the Journal to the leading International Journals’ level in scientific research and technology. We would like to thank all authors who participated in this issue. I would like to thank all members of the editorial board and the advisory board members for their continued support to NJST with their highly valuable advices. Additionally, I would like to thank the manuscript reviewers for providing valuable comments and suggestions to the authors that helped greatly to improve the quality of the papers. We also appreciate the unlimited support and encouragement we received from our colleagues and staff members at the Faculty. The NJST invites contributions from the entire scientific research and technology community. The NJST will assure rapid publication of manuscripts after submission.

I would be delighted if NJST succeeds in fulfilling its mission and objectives and plays a positive role in delivering valuable and interesting information to the worldwide community of scientific research and technology. To attain these values, your cooperation and contribution are highly appreciated. More information about the NJST guidelines for preparing and submitting papers may be obtained from www.neelain.edu.sd
